Notes to the Financial Statements

for the year ended 31 October 2016

1. Accounting basis and distribution policies

The financial statements have been prepared in accordance with the accounting policies set out on pages 11 and 12.

As noted on page 11, during the year the fund has adopted FRS 102 and the 2014 SORP. As a result there are some presentational changes to classification of items in the financial statements. The following presentational changes are considered to be minimal and have no impact on the total return or net asset value in either the current or prior accounting year. In the 'Statement of change in net assets attributable to shareholders' 'Dilution adjustments' are now disclosed as a separate line item.

'Dilution adjustments' totalling £98 (31/10/15: £85) have been reclassified from 'Amounts receivable on creation of shares' of £94 (31/10/15: £80) and 'Amounts payable on cancellation of shares' of £4 (31/10/15: £5).

In the Balance sheet 'Deferred tax payable' totalling £1,095 (31/10/15: £372) has been reclassified from 'Other creditors' to 'Provision for Liabilities' and 'Income tax payable' totalling £6 (31/10/15: £1) has been reclassified from 'Other creditors' to 'Distribution payable'.

2. Net capital gains/(losses)

The net capital gains/(losses) during the year comprise:

	01/11/15 to 31/10/16 £000	01/11/14 to 31/10/15 £000
Non-derivative securities	445	(42)

12. Capital commitments and contingent liabilities

On 31 October 2016, the Fund had no capital commitments (31/10/15: £nil) and no contingent liabilities (31/10/15: £nil).

for the year ended 31 October 2016

13. Risk management policies, derivatives and other financial instruments

A statement of the Fund's objective and the policy for achieving it has been included on page 96. The risks inherent in the Fund's investment portfolio are as follows:

(a) *Currency risk*

The Fund's financial assets and liabilities are currently invested in multi-manager regulated collective investment schemes managed within the Aberdeen Asset Management Group and the Lloyds Banking Group whose prices are quoted in Sterling. As a result, the Fund does not have any direct exposure to foreign currency movements. However, some of the Fund's investments will be affected by movements in exchange rates and ultimately their Sterling values as a result of holdings in investments outside the UK by the Funds in which it invests. As a result, movements in exchange rates may affect the Sterling value of the portfolio investments.

As at the 31 October 2016 the Fund's net foreign currency exposure was less than 10% of the Fund NAV and so no table of currency risk has been disclosed.

The Fund's net foreign currency exposure for the Fund is not deemed to be significant and on that basis no sensitivity analysis is presented.

(b) *Interest rate risk profile of financial assets and liabilities*

The Fund receives revenue from holdings in collective investment schemes. The cashflow from the Fund's underlying investments may fluctuate depending upon the particular decisions made by each Fund. Given that the Fund's objective is to seek capital growth, these cashflows are considered to be of secondary importance and are not actively managed.

The Fund's net cash holding of £17,737 (31/10/15: holding £31,348) is held in a floating rate deposit account whose interest rates are based on LIBOR or its international equivalent.

The interest rate exposure for the Fund is not deemed to be significant and on that basis no sensitivity analysis is presented.

The Fund did not have any long term financial liabilities.

(c) *Liquidity risk*

All of the Fund's financial assets are considered to be readily realisable in accordance with the market practices of the exchange on which they are traded. In general, the Investment Adviser manages the Fund's cash to ensure it can meet its liabilities. Where investments cannot be realised in time to meet any potential liability, the Fund may borrow up to 10% of its value to ensure settlement.

All of the Fund's financial liabilities are payable on demand or in less than one year.

We do not consider these liquidity risks to be significant and therefore no numerical analysis is being presented.

(d) *Market price risk and fair value of financial assets and liabilities*

The Fund invests principally in regulated collective investment schemes managed within the Lloyds Banking Group. The value of these collective investment schemes Funds are not fixed and may go down as well as up. This may be the result of a specific factor affecting the value of an individual asset or be caused by general market factors (such as government policy or the health of the underlying economy) which can affect the entire portfolio. The Investment Adviser seeks to minimise these risks by holding a diversified portfolio of collective investment schemes in line with the Fund's objectives. In addition, the management of the Fund complies with the Financial Conduct Authority COLL Sourcebook, which includes rules prohibiting a holding greater than 20% of assets in any one fund.

There is no material difference between the value of the financial assets and liabilities, as shown in the Balance Sheet, and their fair values.

As at 31 October 2016, if the price of investments held by the Funds increased or decreased by 1%, the resulting change in net assets attributable to shareholders would have been an increase or decrease of approximately 1%; which for this Fund would equate to £88,814 (31/10/15: £32,144).

(e) *Credit risk*

The Fund enters into transactions in financial instruments which expose it to the risk that the counterparty will not deliver the investment (purchase) or cash (sale) after the Fund has fulfilled its obligations. The Fund only buys and sells financial instruments through parties that have been approved by the ACD as acceptable. These are reviewed on an ongoing basis.

Level 1 - Quoted prices for identical instruments in an active market. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, pricing service etc. These include active listed equities, exchange traded derivatives etc.

Level 2 - Valuation techniques with inputs other than quoted prices within level 1 that are observable. This category includes instruments valued using quoted market prices in active markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data. This category will typically include debt securities and collective investment schemes.

Level 3 - Prices using valuation techniques where inputs are unobservable. This category may include single or broker priced securities and suspended or unlisted securities.

The Fund early adopted the FRS102 update made in March 2016.

Managed Growth Fund 4

Investment Markets Overview

for the year ended 31 October 2016

Investment Objective and Policy

The Fund aims to achieve a combination of income and capital growth by mainly investing in a portfolio of collective investment schemes to achieve broad exposure to diversified investments, including equities and fixed interest securities. Property exposure will also be achieved via exposure to collective investment schemes. The Fund will typically take a diversified approach to lower and higher risk assets.

Where appropriate the Fund may also invest directly or indirectly in transferable securities (including closed end funds), depositary receipts, money market instruments, cash, near cash, deposits, derivatives and other regulated collective investment schemes. Use may also be made of unregulated collective investment schemes, stocklending, borrowing and hedging.

The portfolio will normally be fully invested however the ACD may at its discretion invest all or part of the assets of the Fund in cash, deposits, and/or money market instruments in the interests of efficient fund management.

It is not currently intended that derivatives will be used for any purpose other than hedging where it is appropriate to do so and the efficient portfolio management of the Fund. Although derivatives may, subject to the ACD obtaining and maintaining the requisite permissions from the FCA under the Financial Services and Markets Act 2000 and on giving not less than 60 days' notice to shareholders in the Fund, be used in pursuit of its investment objective as well as hedging in the future. If derivatives are used for the purpose of meeting the investment objective of the Fund as well as hedging it is not intended that the use of derivatives would raise the risk profile.

Synthetic Risk and Reward Indicator

There are several different ways of measuring risk. The table below uses an industry standard measure of fund risk based on measuring a fund's volatility using its returns over the past five years. Volatility is generated by both rising and falling prices. Volatility doesn't tell you how much a fund has lost or gained; it indicates how volatile its returns were historically. The Fund's ranking may change over time and may not be a reliable indication of its future risk profile.

This is a separate measure to Scottish Widows' Investment Approaches (where we use our own methodology to take an overall look at funds' risks and aims and categorise our funds as Secure, Cautious, Balanced, Progressive, Adventurous or Specialist). You can read more about them at www.scottishwidows.co.uk/investmentapproaches

<p>As the Fund has been available for less than 5 years, we have used simulated historical data for the part of the 5 year period before the Fund began. The Fund is ranked at 4* because, based on simulated data, it would have experienced medium levels of volatility over the past 5 years.</p> <p>*As disclosed in the key investor information document dated 14 November 2016.</p>	<p>Typically lower rewards, lower risks</p> <p style="text-align: right;">Typically higher rewards, higher risks</p> <p style="text-align: center;">←—————→</p>

Risk Management - Leverage

Leverage is any method by which the ACD increases the exposure of a Fund whether through borrowing of cash or securities, or leverage embedded in derivative positions or by any other means.

The maximum level of leverage which the ACD is entitled to employ on behalf of the Fund is set out in the Prospectus.

Where the investment policy of a Fund permits the use of derivatives and/or forward transactions for investment purposes, the Fund may be leveraged to the extent that this may potentially increase the volatility and risk of the Fund. In addition, when undertaking derivative and forward transactions, the low margin deposits normally required may lead to a higher degree of Leverage, which may also lead to greater fluctuations in the price of a Fund.

The table below sets out the total amount of leverage employed by the Fund as at 31 October 2016, calculated in accordance with the gross method and the commitment method (as defined in the Alternative Investment Fund Managers Directive). This method uses Net Present Value to calculate the exposure of cash and non-derivative holdings and is therefore different to the exposure calculation if the Net Asset Value of the Fund had been used.

On 26 March 2014 Managed Growth Fund 4 was launched with Share Class L Accumulation.

Past performance is not a reliable indicator of future results. The value of an investment and any revenue from it is not guaranteed and can go down as well as up depending on investment performance and currency exchange rates.

Approximately half of the Fund is invested in equities, with the UK market representing the largest single position. The rest of the Fund is invested in global equities, fixed-income securities, predominantly corporate bonds, and in commercial property.

The UK equity market performed well over the year, producing a return of around 12%. Most of these gains were delivered in the last four months of the reporting period. Towards the end of 2015 and at the start of 2016, share prices were held back by concerns about the Chinese economy and the collapse in energy and commodity prices. This had a particularly significant influence on the UK market because of the large number of oil and mining companies that are listed in the UK.

However, despite an intense bout of volatility following the vote to leave the European Union in June, the market has rebounded strongly. In part, this was a result of the Bank of England's economic stimulus measures, which were intended to instil confidence in the economy following the 'Brexit' vote.

The market's recent gains were also a consequence of the fall in the value of the pound, which declined by around 20% against the US dollar. Many of Britain's largest companies make the majority of their profits in overseas currencies. The post-Brexit collapse in the pound increased the value of these profits in sterling terms.

The fall in the value of the pound also boosted the returns from global stock markets for sterling-based investors. Although the UK market was one of the best performers in local currency terms, the effects of currency movements meant that global equity markets, especially those in some emerging markets, provided even better returns.

Looking at bonds, demand for the asset class was boosted by the uncertainty in the run-up to the EU referendum. This pushed yields even lower and into negative territory in several cases. The low yields available from government bonds encouraged investors to look towards the corporate bond market in a hunt for a reasonable level of income.

Commercial property continued to benefit from this hunt for yield up until the UK referendum on EU membership. There was an initial panic in the month or two after the vote, but the market appears to have stabilised a little in recent months. While concerns about Brexit continue to worry investors, a need for income-generating investments and demand from foreign investors have helped to prop up the market.

The Fund produced a return of 10.17% during the 12 months under review. The performance of the Fund was boosted by the relatively small allocation to commercial property and the relatively large holding in global equities, as equities outperformed property.

In terms of stock selection, the property holdings underperformed, falling in value despite a small rise in the value of the wider market. The corporate bond holdings also underperformed, providing a positive return, but failing to capture all of the gains provided by the market.

By the end of the review period, the Fund held a relatively small allocation to commercial property and a relatively large position in equities. We are concerned about the effect the vote to leave the European Union will have on the UK commercial property market.

Overall, we feel that the portfolio is well placed to take advantage of any future stock market gains, while potentially providing a reasonable level of income via its holdings in corporate bonds and commercial property.

Notes to the Financial Statements

for the year ended 31 October 2016

1. Accounting basis and distribution policies

The financial statements have been prepared in accordance with the accounting policies set out on pages 11 and 12.

As noted on page 11, during the year the fund has adopted FRS 102 and the 2014 SORP. As a result there are some presentational changes to classification of items in the financial statements. The following presentational changes are considered to be minimal and have no impact on the total return or net asset value in either the current or prior accounting year. In the 'Statement of change in net assets attributable to shareholders' 'Dilution adjustments' are now disclosed as a separate line item.

'Dilution adjustments' totalling £nil (31/10/15: £117) have been reclassified from 'Amounts receivable on creation of shares' of £nil (31/10/15: £113) and 'Amounts payable on cancellation of shares' of £nil (31/10/15: £4).

In the Balance sheet 'Deferred tax payable' totalling £1,508 (31/10/15: £594) has been reclassified from 'Other creditors' to 'Provision for Liabilities'.

2. Net capital gains/(losses)

The net capital gains/(losses) during the year comprise:

	01/11/15 to 31/10/16	01/11/14 to 31/10/15
	£000	£000
Non-derivative securities*	941	(108)

*Includes realised gains of £31,000 and unrealised gains of £910,000 (31/10/15: realised gains of £22,000 and unrealised losses of £130,000). Included in realised gains for the year were unrealised gains/(losses) recognised in the prior accounting year.

3. Revenue

12. Capital commitments and contingent liabilities

On 31 October 2016, the Fund had no capital commitments (31/10/15: £nil) and no contingent liabilities (31/10/15: £nil).

for the year ended 31 October 2016

13. Risk management policies, derivatives and other financial instruments

A statement of the Fund's objective and the policy for achieving it has been included on page 110. The risks inherent in the Fund's investment portfolio are as follows:

(a) *Currency risk*

The Fund's financial assets and liabilities are currently invested in multi-manager regulated collective investment schemes managed within the Aberdeen Asset Management Group and the Lloyds Banking Group whose prices are quoted in Sterling. As a result, the Fund does not have any direct exposure to foreign currency movements. However, some of the Fund's investments will be affected by movements in exchange rates and ultimately their Sterling values as a result of holdings in investments outside the UK by the Funds in which it invests. As a result, movements in exchange rates may affect the Sterling value of the portfolio investments.

As at the 31 October 2016 the Fund's net foreign currency exposure was less than 10% of the Fund NAV and so no table of currency risk has been disclosed.

The Fund's net foreign currency exposure for the Fund is not deemed to be significant and on that basis no sensitivity analysis is presented.

The Fund did not have any long term financial liabilities.

(b) *Interest rate risk profile of financial assets and liabilities*

The Fund receives revenue from holdings in collective investment schemes. The cashflow from the Fund's underlying investments may fluctuate depending upon the particular decisions made by each Fund. Given that the Fund's objective is to seek capital growth, these cashflows are considered to be of secondary importance and are not actively managed.

The Fund's net cash holding of £61,375 (31/10/15: holding £56,038) is held in a floating rate deposit account whose interest rates are based on LIBOR or its international equivalent.

The interest rate exposure for the Fund is not deemed to be significant and on that basis no sensitivity analysis is presented.

(c) *Liquidity risk*

All of the Fund's financial assets are considered to be readily realisable in accordance with the market practices of the exchange on which they are traded. In general, the Investment Adviser manages the Fund's cash to ensure it can meet its liabilities. Where investments cannot be realised in time to meet any potential liability, the Fund may borrow up to 10% of its value to ensure settlement.

All of the Fund's financial liabilities are payable on demand or in less than one year.

We do not consider these liquidity risks to be significant and therefore no numerical analysis is being presented.

(d) *Market price risk and fair value of financial assets and liabilities*

The Fund invests principally in regulated collective investment schemes managed within the Lloyds Banking Group. The value of these collective investment schemes Funds are not fixed and may go down as well as up. This may be the result of a specific factor affecting the value of an individual asset or be caused by general market factors (such as government policy or the health of the underlying economy) which can affect the entire portfolio. The Investment Adviser seeks to minimise these risks by holding a diversified portfolio of collective investment schemes in line with the Fund's objectives. In addition, the management of the Fund complies with the Financial Conduct Authority COLL Sourcebook, which includes rules prohibiting a holding greater than 20% of assets in any one fund.

There is no material difference between the value of the financial assets and liabilities, as shown in the Balance Sheet, and their fair values.

As at 31 October 2016, if the price of investments held by the Funds increased or decreased by 1%, the resulting change in net assets attributable to shareholders would have been an increase or decrease of approximately 1%; which for this Fund would equate to £146,344 (31/10/15: £61,005).

(e) *Credit risk*

The Fund enters into transactions in financial instruments which expose it to the risk that the counterparty will not deliver the investment (purchase) or cash (sale) after the Fund has fulfilled its obligations. The Fund only buys and sells financial instruments through parties that have been approved by the ACD as acceptable. These are reviewed on an ongoing basis.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, pricing service etc. These include active listed equities, exchange traded derivatives etc.

Level 2 - Valuation techniques with inputs other than quoted prices within level 1 that are observable. This category includes instruments valued using quoted market prices in active markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data. This category will typically include debt securities and collective investment schemes.

Level 3 - Prices using valuation techniques where inputs are unobservable. This category may include single or broker priced securities and suspended or unlisted securities.

The Fund early adopted the FRS102 update made in March 2016.

Managed Growth Fund 6

Investment Markets Overview

for the year ended 31 October 2016

Investment Objective and Policy

The Fund aims to achieve a combination of income and capital growth by mainly investing in a portfolio of collective investment schemes to achieve broad exposure to diversified investments, including equities and fixed interest securities. Property exposure will also be achieved via exposure to collective investment schemes. The Fund will typically have high exposure to assets providing potential for growth, such as equities.

Where appropriate the Fund may also invest directly or indirectly in transferable securities (including closed end funds), depositary receipts, money market instruments, cash, near cash, deposits, derivatives and other regulated collective investment schemes. Use may also be made of unregulated collective investment schemes, stocklending, borrowing and hedging.

The portfolio will normally be fully invested however the ACD may at its discretion invest all or part of the assets of the Fund in cash, deposits, and/or money market instruments in the interests of efficient fund management.

It is not currently intended that derivatives will be used for any purpose other than hedging where it is appropriate to do so and the efficient portfolio management of the Fund. Although derivatives may, subject to the ACD obtaining and maintaining the requisite permissions from the FCA under the Financial Services and Markets Act 2000 and on giving not less than 60 days' notice to shareholders in the Fund, be used in pursuit of its investment objective as well as hedging in the future. If derivatives are used for the purpose of meeting the investment objective of the Fund as well as hedging it is not intended that the use of derivatives would raise the risk profile.

Synthetic Risk and Reward Indicator

There are several different ways of measuring risk. The table below uses an industry standard measure of fund risk based on measuring a fund's volatility using its returns over the past five years. Volatility is generated by both rising and falling prices. Volatility doesn't tell you how much a fund has lost or gained; it indicates how volatile its returns were historically. The Fund's ranking may change over time and may not be a reliable indication of its future risk profile.

This is a separate measure to Scottish Widows' Investment Approaches (where we use our own methodology to take an overall look at funds' risks and aims and categorise our funds as Secure, Cautious, Balanced, Progressive, Adventurous or Specialist). You can read more about them at www.scottishwidows.co.uk/investmentapproaches

<p>As the Fund has been available for less than 5 years, we have used simulated historical data for the part of the 5 year period before the Fund began. The Fund is ranked at 4* because, based on simulated data, it would have experienced medium levels of volatility over the past 5 years.</p> <p>*As disclosed in the key investor information document dated 14 November 2016.</p>	<p>← Typically lower rewards, lower risks Typically higher rewards, higher risks →</p>

Risk Management - Leverage

Leverage is any method by which the ACD increases the exposure of a Fund whether through borrowing of cash or securities, or leverage embedded in derivative positions or by any other means.

The maximum level of leverage which the ACD is entitled to employ on behalf of the Fund is set out in the Prospectus.

Where the investment policy of a Fund permits the use of derivatives and/or forward transactions for investment purposes, the Fund may be leveraged to the extent that this may potentially increase the volatility and risk of the Fund. In addition, when undertaking derivative and forward transactions, the low margin deposits normally required may lead to a higher degree of Leverage, which may also lead to greater fluctuations in the price of a Fund.

The table below sets out the total amount of leverage employed by the Fund as at 31 October 2016, calculated in accordance with the gross method and the commitment method (as defined in the Alternative Investment Fund Managers Directive). This method uses Net Present Value to calculate the exposure of cash and non-derivative holdings and is therefore different to the exposure calculation if the Net Asset Value of the Fund had been used.

	31/10/16

Gross leverage	99.64
Commitment leverage	99.78

Source: Lipper for Managed Growth Fund 6. Basis: Revenue (net of tax) reinvested and net of expenses.

On 26 March 2014 Managed Growth Fund 6 was launched with Share Class L Accumulation.

Past performance is not a reliable indicator of future results. The value of an investment and any revenue from it is not guaranteed and can go down as well as up depending on investment performance and currency exchange rates.

The Fund mainly invests in UK equities, but it also has holdings in global equities, corporate bonds and commercial property.

The UK equity market performed well over the year, producing a return of around 12%. Most of these gains were delivered in the last four months of the reporting period. Towards the end of 2015 and at the start of 2016, share prices were held back by concerns about the Chinese economy and the collapse in energy and commodity prices. This had a particularly significant influence on the UK market because of the large number of oil and mining companies that are listed in the UK.

However, despite an intense bout of volatility following the vote to leave the European Union in June, the market has rebounded strongly. In part, this was a result of the Bank of England's economic stimulus measures, which were intended to instil confidence in the economy following the 'Brexit' vote.

The market's recent gains were also a consequence of the fall in the value of the pound, which declined by around 20% against the US dollar. Many of Britain's largest companies make the majority of their profits in overseas currencies. The post-Brexit collapse in the pound increased the value of these profits in sterling terms.

The fall in the value of the pound also boosted the returns from global stock markets for sterling-based investors. Although the UK market was one of the best performers in local currency terms, the effects of currency movements meant that global equity markets, especially those in some emerging markets, provided even better returns.

Looking at bonds, demand for the asset class was boosted by the uncertainty in the run-up to the EU referendum. This pushed yields even lower and into negative territory in several cases. The low yields available from government bonds encouraged investors to look towards the corporate bond market in a hunt for a reasonable level of income.

Commercial property continued to benefit from this hunt for yield up until the UK referendum on EU membership. There was an initial panic in the month or two after the vote, but the market appears to have stabilised a little in recent months. While concerns about Brexit continue to worry investors, a need for income-generating investments and demand from foreign investors have helped to prop up the market.

During the review period, the Fund produced a return of 12.61%. Performance was boosted by the relatively small allocation to commercial property and the large allocation to equities, which produced the best performance of the main asset classes.

In terms of stock selection, the property holdings underperformed, falling in value despite a small rise in the value of the wider market. The corporate bond holdings also underperformed, providing a positive return, but failing to capture all of the gains provided by the corporate bond market.

By the end of the review period, the Fund held relatively small allocations to UK equities and commercial property and a relatively large position in high yield corporate bonds. We think the portfolio is now well positioned to participate in any future stock market gains, while potentially offering some income via the holdings in corporate bonds and property.

Notes to the Financial Statements

for the year ended 31 October 2016

1. Accounting basis and distribution policies

The financial statements have been prepared in accordance with the accounting policies set out on pages 11 and 12.

As noted on page 11, during the year the fund has adopted FRS 102 and the 2014 SORP. As a result there are some presentational changes to classification of items in the financial statements. The following presentational changes are considered to be minimal and have no impact on the total return or net asset value in either the current or prior accounting year. In the 'Statement of change in net assets attributable to shareholders' 'Dilution adjustments' are now disclosed as a separate line item.

'Dilution adjustments' totalling £nil (31/10/15: £87) have been reclassified from 'Amounts receivable on creation of shares' of £nil (31/10/15: £88) and 'Amounts payable on cancellation of shares' of £nil (31/10/15: £(1)).

2. Net capital gains/(losses)

The net capital gains/(losses) during the year comprise:

	01/11/15 to 31/10/16 £000	01/11/14 to 31/10/15 £000
Non-derivative securities*	1,101	(108)

*Includes realised losses of £8,000 and unrealised gains of £1,109,000 (31/10/15: realised gains of £22,000 and unrealised losses of £130,000). Included in realised losses for the year were unrealised gains/(losses) recognised in the prior accounting year.

3. Revenue

	01/11/15 to 31/10/16 £000	01/11/14 to 31/10/15 £000

General Information

About OEICs

The Investment Portfolio ICVC (the "Company") is an umbrella Open Ended Investment Company ("OEIC"). An OEIC is a collective investment vehicle with variable capital in which your funds are pooled with a portfolio of investments in accordance with its Prospectus and the Collective Investment Schemes Sourcebook (COLL Sourcebook).

Scottish Widows is committed to being a responsible investor on behalf of our customers, with particular focus on Stewardship, Ethical investment and Environmental, Social and Governance (ESG) issues. Our commitment to responsible investment is explained in more detail through this link: www.scottishwidows.co.uk/about_us/responsibleinvestment

It should be remembered that the value of your shares will be affected by fluctuations in the relevant markets and foreign currency exchange rates (where applicable) and may, therefore, go down as well as up. You should view your investment over the medium to long-term.

Please contact us on 0345 300 2244 for more information. We may record and monitor calls to help us improve our service.

All sub-funds are classified as non-UCITS retail schemes which comply with Chapter 5 of the COLL Sourcebook.

The base currency of the Company is Sterling, but a class of shares in respect of any sub-fund may be designated in any currency other than Sterling.

Shares

The Company currently offers five share classes; Class A, Class L, Class P, Class Q and Class X. Each share class has a different ACD fee.

Prices and Dealing Times

The price used for either the purchase or sale of shares is normally the next price calculated after your instructions are received and accepted at our Edinburgh Office. Advisers have no authority to guarantee applications or prices.

The latest prices are obtainable from the Dealing Desk on 0845 845 0066.

Shares may be bought or sold between 9:00am and 5:00pm on Mondays to Fridays inclusive.

Liability

Shareholders are not liable for the debts of the Company.

Prospectus

The Prospectus, which is available from the ACD free of charge, outlines how the Company is managed and gives details of the types of assets in which each sub-fund may invest. There were no changes made to the Company or reflected in the Prospectus during the year to 31 October 2016. Full terms and conditions are available from the ACD.

Personal Taxation

Unless your shares are held within an ISA, if you sell your shares or switch your shares to a different sub-fund, this is treated as a disposal for Capital Gains Tax purposes. Tax rules can change. The value to an investor of the tax advantages of an ISA will depend on personal circumstances, which may change.

Shareholders are recommended to consult with their professional tax advisors if they are in any doubt about their position.

Queries

If you have any queries about the operation of your sub-fund you should in the first instance contact the ACD. Please supply details of your holding (including surname, initials and account number).
